ZUVA INTEGRATION

About the integration

We're excited to announce that Heretik has partnered with Zuva! Zuva's DocAI, powered by the industry-leading machine learning technology developed over the past 10+ years at Kira Systems, is now fully available to Heretik customers with just a few clicks. You can now run any of the 1200+ pre-trained models from Zuva directly within Heretik and enjoy all of the benefits you're used to within the Heretik Viewer. We're excited for you to experience best-in-breed contract AI (Zuva) paired with best-in-breed contract review workflow (Heretik).

Zuva is a spin-out of Kira Systems, a leader in the contract analysis space and trusted by a majority of the AmLaw 100 law firms. With Zuva comes the team of Machine Learning scientists, designers and developers, who over the past 11 years have built and refined this patented, award-winning technology.
